To Those in Quest of A RUG...

To Intending Purchasers
of Rugs we would state that just before
the change in tariff we received a large
and varied assortment of

Japanese Rugs

By purchasing these Rugs before
the change, a saving of about fifty (50)
per cent. was effected, which our cus-
tomers are to profit by, as we do not in-
tend, at present, to increase the price
but will sell them, while they last, at the
old figure.

Under these conditions, a buyer
here can now purchase these Rugs
for much less than they are sold for on
the mainland.

We have made a display of these
Very Handsome Rugs in our large,
central show window, where their beau-
tiful designs and harmonious coloring is
sure to attract attention.

Of Interest to the Ladies...

Few women care for the
hair as they should. When
the hair begins to come out
they are alarmed. It would
be much better if they give it
more attention when it is in a
healthy condition. The first
requisite in the care of the
hair is a GOOD TONIC. Just
the kind we keep. Our Hair
Tonic will kill dandruff. Stop
the hair from falling out. Cure
itchiness of the scalp. Make
the hair soft and glossy. It
keeps the hair and scalp in a
healthy condition.
Try a bottle and give it a
trial.

New Classification of Teachers and Salaries.

Gradual Advance Provided For By
School Board for Efficient
Service.

A thorough revision and classifica-
tion of schools and teachers' salaries
has just been completed by the board
of education. Salaries are graded as
to schools and lengths of service, and
that a teacher who follows the govern-
ment and renders efficient service can
secure a steady increase in salary.

The formulated classification and
salaries are as follows:
1. This schedule is not to be consid-
ered as the salary of a contract teacher,
but may be altered or suspended at
any time if it is deemed necessary.
2. Schools will be classified and salar-
ies fixed at the beginning of each
school year. Satisfactory service only
will entitle a teacher to a raise in salary.
3. Teachers obtaining normal certifi-
cates will be allowed one year's ex-
perience. One-half of the time taught
outside of the city will be counted
toward the department and teachers,
but may be altered or suspended at
any time if it is deemed necessary.
4. A teacher promoted to a higher
position will begin at the lowest salary
of that position, and if for one
year his services have been satisfac-
tory, an previous experience may be
allowed.
5. Competent teachers in undesirable
locations or where living is unusually
expensive may be paid above the
schedule.
6. Teachers of schools with an en-
rollment under 40 will be classified as
assistants.
7. The Royal, Kapiolani, Kahanu, and
Honolulu Normal and High Union
schools are hereby recognized as of
the same class, the principals of which
will receive salaries of \$2,500 a year
each without regard to length of ser-
vice.

TRUE ORIGIN OF KISSING.

Professor Lombroso Has a Theory
Acceptable to Scientists.
The English Sunday.

According to Professor Cesare Lom-
broso, the distinguished Italian crimin-
ologist, kissing is quite a modern prac-
tice and originated in a very curious
manner. The kiss, as a token of af-
fection, was unknown to the old Greeks,
and neither in Homer nor in Herodotus
do we find any mention of it. Hector did
not kiss his Andromache when he bade
her farewell, neither did Paris press his
lips to those of the beautiful Helen,
and Ulysses, who was more of a cos-
mopolitan than any man of his day,
never dreamed of kissing the enchant-
ing Circe, and when after long wander-
ings he returned home to his spouse
Penelope, he satisfied himself with put-
ting one of his stalwart arms around
her waist and drawing her to him.

The people of Terra del Fuego, says
Lombroso, have taught civilized na-
tions the origin of the delightful art of
kissing. Drinking vessels are unknown
in that country, and the people when
they are thirsty simply lie down beside
brooks and drink the water as it flows
by them. It is evident, however, that
infants could not satisfy their thirst in
this primitive fashion, and therefore
their mothers have for ages supplied
them with water by filling their own mouths
first and then letting it pass through
their lips into the expectant mouths of
their little ones. In some places the
banks of the brooks and rivers are so
high that water cannot be obtained in
the usual manner, and the mothers in
such places draw it through long reeds.
Birds feed their young ones in a sim-
ilar manner. They first fill their own
mouths with water and then transfer
it to the wide open mouths of the little
ones. This very ancient maternal prac-
tice is, according to Lombroso, the only
source to which the modern practice of
kissing can be traced. The custom of
pressing one mouth to another origi-
nated with the women in Terra del
Fuego, who could only supply their in-
fants with drink in this manner, and
it is presumable that they learned the
lesson from the birds. Finally we are
told that kissing is an evidence of at-
tachment and a memorial of that early
stage in our development "during
which the wife has not yet triumphed
over the mother nor love over mat-
ernity."

Lombroso's views on this subject
meet with the general approval of sci-
entists, though there are some who
point out that his explanation of the
origin of kissing is not in accordance
with the one handed down to us by
the old Romans. These latter main-
tained that the kiss was invented by
husbands, who desired to ascertain in
this way whether during their absence
from home their wives had been drink-
ing their wine or not.

Pests Not Bad on Hawaii.

Professor Koebel, the government
entomologist, returned yesterday morn-
ing and reported all well on the big
island. He stated that the rumor of
the rapid increase of pests was false,
the scale bug alone showing any in-
crease. The professor brought with
him about thirty different samples of
seed, which he will plant in the ad-
jacent hills and valleys. Sandalwood
was found among the specimens.

largements.
